

Women's Animal Center Shelter Annual Statistics 2024

Start Date: 1/1/2024

End Date: 12/31/2024

Annual Save Rate: 91.56%

The above Annual Save Rate is calculated using the following equation provided by Best Friends Animal Society: $[\text{Total Intake} - (\text{Total Euthanasia} + \text{Died or Lost in Care}) / \text{Total Intake} - \text{Unhealthy/Untreatable Euthanasia}]$. Note: The Best Friends organization gathers lifesaving statistics from shelters/rescues across the country to create the Best Friends National Animal Shelter Statistics Dashboard. Shelters meeting the 90% save rate benchmark are considered no-kill.

Women's Animal Center considers Owner Requested Euthanasia to be unhealthy/untreatable animals surrendered with the explicit request of euthanasia or animals that were unhealthy/untreatable at the point of surrender and upon follow up conversations, the surrenderer either expected euthanasia or, following fee waived diagnostics, changed their original intention/request.

INTAKES	Dogs	Cats	Other	Total
From the Public	593	1260	119	1972
Transfers from Organizations	6	48	1	55
